

Having lived in Japan, Danish painter **EGE ARP-HANSEN** has been influenced by their arts – both ancient and modern – along with those of China and Korea in the development of his meditative painting style. Infinity and monochromes fascinate him. This can be seen when he investigates a single pigment in its nuances. In some paintings the motif appears almost invisible however the complexity slowly unfolds. They need a moment of quietude and an open mind to evolve. In other works the colours vibrate intensively almost sensually but it still takes time and attention to reveal their deeper qualities. Upcoming solo at quaint Galleri Nybro in down-town Copenhagen from Friday 17/7/2020 - Sunday 2/8/2020.
